BOA®

The system is characterized by firm fastening that is non-elastic, easy and secure. There is impossible to loose (only in case of damage) it what guarantees the best stabilization.

Our BOA System provides different levels of compression. It's based on differential polyamide grommets, steel wires covered by plastic and knobs. The additional equipment is the special element that is easy to attach what allows to modify device's shape or circumference.

The BOA System is the compression solution so you can use it only after putting the brace on the body.
Setting up

BOA SYSTEM IS MANITENANCE-FREE SYSTEM THAT DOES NOT REQUIRE SPECIAL SERVICE OR CONSERVATION
