- ANTI-SLIPPING SILICONE
- ANATOMICALLY FORMED CONDYLE PAD FOR THE WEARING COMFORT
- INNOVATIVE 2RA DROP LOCK
- SHORTENED LOWER FRAME FOR IMPROVED WEARING TOGETHER WITH SKI BOOTS

Ski and snowboard boots and bindings that have helped reduce ankle and shin injuries appear to have contributed to the increase in ACL injuries.

These boots and bindings protect ankle joint perfectly, but their release mechanisms are not fast enough to protect the knee from a sudden twisting injury. So, if you need professional knee support in skiing, choose our functional ski knee brace RAPTOR SHORT.
