DOC_PPWR_2026_0001/R4M/EN

EU DECLARATION OF CONFORMITY

with the requirements of Regulation (EU) 2025/40 (PPWR) and related legislation concerning packaging materials applicable from 12 August 2026

Dear Sir or Madam,

We hereby confirm that REH4MAT Sp. z o.o., with its registered office in Rzeszów, at Zenitowa 5A, 35-301 Rzeszów, Poland, VAT ID No. 8133908820, **acts as a manufacturer, distributor and importer of products in packaging, as well as a packaging manufacturer**, in accordance with the requirements of Regulation (EU) 2025/40 of the European Parliament and of the Council of 19 December 2024 on packaging and packaging waste (PPWR).

In connection with the obligations arising from this Regulation, in particular those concerning ensuring the conformity of packaging before it is made available on the market of the European Union, REH4MAT Sp. z o.o. collects, verifies and retains technical documentation and documents confirming the conformity of packaging suppliers with the applicable requirements of the PPWR, to the extent appropriate to its role and the nature of the packaging supplied.

REH4MAT Sp. z o.o. declares that, **irrespective of its role as a manufacturer, distributor and importer of products in packaging, as well as a packaging manufacturer**, a process of collecting, verifying and archiving technical documentation and documents confirming compliance with the requirements of the PPWR is carried out for each type of packaging, in accordance with the obligations of economic operators set out in Regulation (EU) 2025/40 and with due diligence.

Material Requirements in accordance with Article 5 of the PPWR

We hereby confirm that the packaging made available by us complies with all material requirements set out in Article 5 of the PPWR.

In particular, this concerns the timely fulfilment of obligations:

- ✓ with regard to demonstrating compliance with the limits on the content of heavy metals in materials; and with regard to the applicable restrictions on PFAS in packaging intended to come into contact with food. **Not applicable.**

Compliance with the requirements set out in Article 5 is confirmed as follows:

✓ **Material limit values – heavy metals:**

Based on the current analyses and declarations provided by our suppliers, we confirm that the limit for the total content of heavy metals – lead (Pb), cadmium (Cd), mercury (Hg) and chromium (VI) – **is met**:

$$\Sigma (\text{Pb} + \text{Cd} + \text{Hg} + \text{Cr VI}) \leq 100 \text{ mg/kg of material.}$$

Furthermore, all packaging materials are subject to continuous internal quality control.

- ✓ REH4MAT Sp. z o.o., as a **manufacturer, distributor and importer of products in packaging, as well as a packaging manufacturer, with regard to all packaging materials offered, is registered in the Polish BDO system** under number **000618865** and fulfils the obligations arising from the applicable Polish legislation on packaging and packaging waste concerning packaging placed on the market in Poland.
- ✓ Regulation (EU) 2025/40 of the European Parliament and of the Council on packaging and packaging waste (PPWR);
- ✓ Directive 94/62/EC on packaging and packaging waste, to the extent applicable;
- ✓ Regulation (EC) No 1907/2006 (REACH);
- ✓ Regulation (EU) 2019/1021 concerning persistent organic pollutants (POPs);
- ✓ other applicable provisions of European Union law concerning the safety of materials and substances used in the manufacture of packaging.

We would also like to inform you that not all requirements of Regulation (EU) 2025/40 (PPWR) have entered into force and become applicable as of 12 August 2026.

The European Commission will issue numerous delegated and implementing acts concerning various obligations. These acts should be made available sufficiently in advance of their entry into force and may affect the date on which individual obligations begin to apply. This makes early implementation more difficult and applies in particular to the following **future obligations listed below**:

- ✓ Recyclability in accordance with Article 6 (from 2030);
- ✓ Minimum recycled content and compostability in accordance with Articles 7 and 9 (from 2030 or 2028);
- ✓ Reduction of packaging in accordance with Articles 10 and 24 (no earlier than 12 February 2028);
- ✓ Labelling in accordance with Article 12 (from 12 August 2028);
- ✓ Reuse in accordance with Article 11 and Articles 26–29 et seq. (specific provisions from 2030).

For paper and cardboard packaging, the following design for recycling requirements (**recyclability of packaging**) apply:

✓ **By 1 January 2028**, the European Commission is to adopt delegated acts setting out detailed design for recycling criteria;

✓ **From 1 January 2030**, packaging placed on the market will be required to comply with the design for recycling requirements (in accordance with the adopted criteria);

✓ **From 1 January 2035**, packaging will be required not only to be designed for recycling, but also to demonstrate that it can be recycled “at scale”.

✓ **Minimum recycled content in packaging:**

The PPWR does not introduce a mandatory minimum percentage of recycled content for paper and cardboard packaging.

Mandatory recycled content levels apply exclusively to **plastic packaging** (subject to the exceptions specified in the Regulation), e.g. from **2030** and **2040** for specific categories of plastic packaging.

All statements contained in this Declaration of Conformity are based on the current legal framework and are subject to any changes in legislation or postponements of deadlines by the authorities of the European Union.
